PROFILE

Passionate about software engineering and problem-solving, I enjoy developing innovative solutions that enhance user experience, optimize workflows, and create solutions to everyday problems.

EDUCATION

University of St. Thomas, St. Paul, MN — May 2026

Candidate for Bachelor of Science; Major: Computer Science; Minors: Game Design and Mathematics

- **Relevant Coursework:** Advanced Business Intelligence Development — used Power BI, DAX, and Python for data analysis; applied ML models for business analytics.

WORK EXPERIENCE

Big Chuck Data LLC — August 2024 -- Present

Owner / Software Engineer

- Led development of a SwiftUI photo-filtering feature for a Japan-based startup's 3D iPhone screen protector app.
- Influenced UI/UX design decisions to enhance functionality and usability.
- Resolved critical bugs to minimize delays and ensure successful rollouts.

Honey Smitten — Spring 2024 -- Present

Software Development Intern / Operations Support

- Developed a web app for profit optimization and automated Google Sheets invoice tracking.
- Designed QuickBooks Online inventory processes for lot numbers, flavors, and fulfillment.
- Conducted sales outreach to boutiques and represented the company at trade shows.

Washington School (AVID Program) — Fall 2025 -- Present

Tutor

- Guided students in peer learning to build skills and confidence.
- Assisted with assignments using questions to foster independent problem-solving.

PROJECTS

Contract-Based UI/UX Development — August 2024 -- Present

Designed SwiftUI UI/UX components for a media app, ensuring consistency and optimal performance.

Automated Instagram Poster — 2024

Created a tool to extract eBay images, add color-matched padding, and overlay a logo for Instagram posts.

SKILLS

Programming Languages: Python, Java, JavaScript, C++, C, HTML/CSS, SQL, SwiftUI, Node.js, React
Cloud & DevOps: AWS (S3, CloudFront, RDS, DynamoDB, MediaConvert, Elastic Beanstalk, VPC), CloudWatch
Data & Business Intelligence: Power BI, DAX, PostgreSQL, DynamoDB, data modeling, ML (pre-trained/custom)
Video Processing & Delivery: HLS streaming, MediaConvert, Lambda automation, signed URLs
Security & Infrastructure: VPC configuration, IAM least privilege, S3 encryption, HTTPS, WAF
Web Development & Automation: REST APIs, Google Sheets integrations, lightweight web applications
Software Development Tools: JetBrains IDEs, UNIX/Linux, Visual Studio, Eclipse, Xcode
Problem-Solving: Debugging critical bugs, optimizing workflows, scalable architecture design
Communication Skills: Collaborated with teams, product demos, public interactions
Linguistics: Japanese (intermediate — oral and written); Hebrew (basic — oral and written)
